

MAMMOTH P

New Product Release January 2016

MAMMOTH P by Growcentia

Developed by soil microbiologists with a passion for enhancing soil health and promoting sustainable agriculture. The goal of Growcentia is to help growers maximize the health of their soils or media to enhance plant health and yields, while minimizing environmental impacts of agriculture.

- Microbial biostimulant that elevates phosphorus and micronutrient availability
- Use during vegetative and flowering stages of plant growth
- Suitable for hydroponics or soilless media
- Safe to use with any nutrient formula and all pH buffers

Phosphorus (P) is vital to plant growth and is found in every living plant cell. It is involved in several key plant functions, including energy transfer, photosynthesis, transformation of sugars and starches, nutrient movement within the plant and transfer of genetic characteristics from one generation to the next.

Mammoth P available in 1000 mL, 500 mL, and 250 mL sizes.
